Behavioral Health Organizational Provider Endorsement: Application Process

Overview

Our priority is to maintain a high clinical standard of care for our members. Our credentialing policy will help ensure that providers within mental health organizations and primary care settings receive the appropriate level of supervision and oversight. Our goal is to ensure excellent member care and to support expansion of the behavioral health workforce. Additionally, we allow organizationally credentialed provider groups to explore the deployment of staff to function as case managers, community outreach personnel, or peers. This encourages clinics to design a high-quality continuum of care by effectively using staff who can deliver services that are appropriate to their level of training and education.

If you have any credentialing questions, please email credentialing@coaccess.com.

If you have questions about the requirements on page 2, please email clinical@coaccess.com.
